

Table S2: True markers and inferred markers in each module. Posterior probabilities are calculated based on the joint appearance of the corresponding marker(s) from the last 25,000 iterations.

| Module | True Markers | Posterior Inference | |
|--------|-----------------|---------------------|-----------------|
| | | Markers | Posterior Prob. |
| A | (270, 100, 172) | (270, 100, 172) | 0.988 |
| B | (490, 149) | (490, 149) | 0.503 |
| | | (491, 149) | 0.490 |
| C | 292 | 292 | 0.751 |
| | | (292, 61) | 0.142 |
| | | (292, 62) | 0.103 |
| D | (443, 191) | (443, 191) | 0.813 |
| | | 191 | 0.109 |
