

Table S2: The regulatory relationship between TFa and three sets of genes in three species. The number of genes found in each set is given in parentheses.

Phenotype	Genes Species	Regulated by TFa		
		rRNA (58)	STR (73)	MRP (51)
anaerobic	<i>S. cerevisiae</i>	No	Yes	No
	<i>C. glabrata</i>	No	Yes	No
aerobic	<i>C. albicans</i>	No	Yes	Yes
