

Table S3. Polymorphic model elements of the cell cycle model [22]. A list of cell cycle model elements and parameters used to manifest genetic variation. Parameter names from Table 1 and Table 2 in the original publication ([22]), names used in the CellML file retrieved from http://models.cellml.org/workspace/chen_calzone_csikaszny_cross_novak_tyson_2004 and baseline values with units.
