

TSC activity compared to neocortex

- Significantly higher in TSC compared to neocortex
- Significantly higher in neocortex compared to TSC
- Active in TSC and neocortex, significantly higher in none
- Inactive in both cell types

TGC activity compared to neocortex

- Significantly higher in TGC compared to neocortex
- Significantly higher in neocortex compared to TGC
- Active in TGC and neocortex, significantly higher in none
- Active in TGC, but not significantly higher than neocortex
- Active in neocortex, but not significantly higher than TGC
- Inactive in both cell types
