internal segment size difference too large $I(A) \approx \mu$ no edge $I(B) > \mu$ В both alignment pairs suggest deletion but overlap too small $I(A) > \mu$ no edge вΙ $I(B) > \mu$ C two alignments with average internal segment size $I(A) \approx \mu$ draw edge В $I(B) \approx \mu$ D two deletion-suggesting pairs with sufficient overlap $I(A) > \mu$ draw edge $I(B) > \mu$
